

## HULL STIFFENER

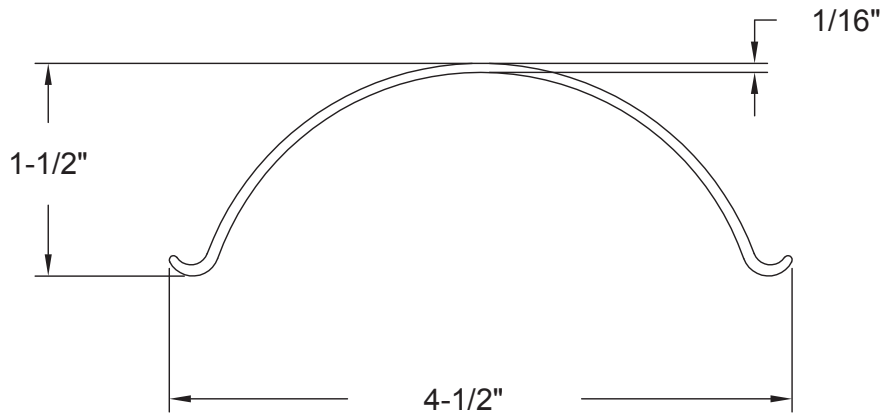

Taco Marine introduces a versatile Hull Stiffener product, which provides a cost effective means of adding additional stiffness to aluminum or fiberglass panels. Easy installation on most wood or fiberglass materials. Construction provides adhesive installation on composite or metal materials. Material can be drilled for fastener use as well.

### FEATURES & BENEFITS

- Can be laminated against hull, deck, or hatch surfaces
- Provides quick installation of stiffening material onto laminated panels
- Poly Styrene material allows good laminate bonding
- Cost effective 10 foot lengths
- Easily cut shorter for multiple applications
- Low profile for shallow cavity locations
